Definitions

Control plane
Actions specify the operations that a role is allowed to perform. NotActions specify the operations that are excluded from the allowed Actions (this is useful if a role has wildcards).

Data plane
DataActions specify the operations that a role is allowed to perform to the data within an object. NotDataActions specify the operations that are excluded from the allowed DataActions (this is useful if a role has wildcards).

Wildcards (*)
A wildcard (*) extends a permission to everything that matches the string you provide. To add a wildcard permission, use the JSON tab.
