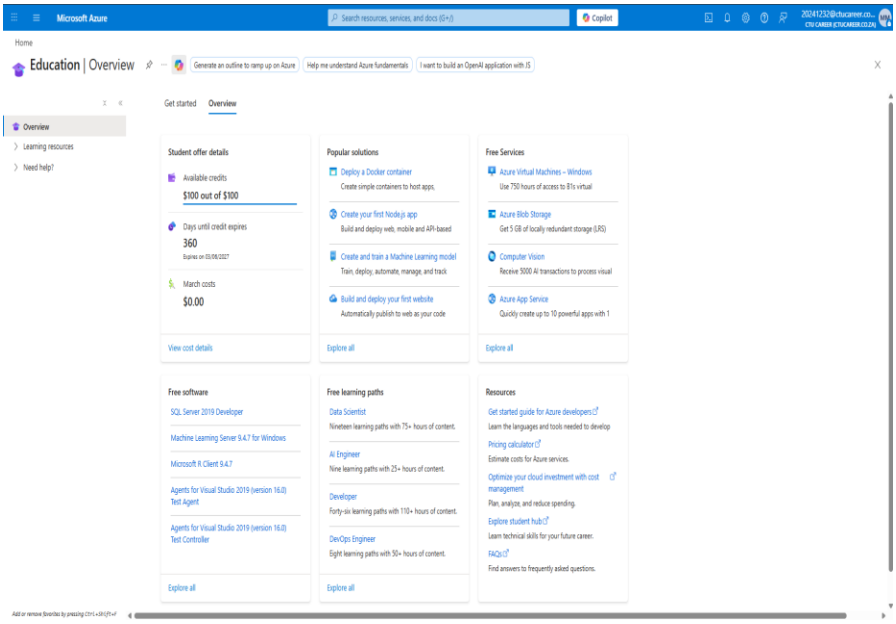
Maso Mbali

NET731 Week 1

Student Credit shown as $100



1.Defining the business requirements for CTU Training Solutions

-CTU Training Solutions is a private training institution in South Africa that provides career-focused education in areas such as Information Technology, business, and design. It focuses on giving students practical, relevant work-field skills through a combination of classroom learning and digital platforms to prepare them for the workplace.

-CTU Training Solutions requires a cloud-based system using Microsoft Azure to support its training services, student access, and internal operations. The goal is to create a secure, scalable, and reliable platform that allows students and staff to access learning materials, manage courses, and store important data online.

2. Azure Services Required for CTU Training Solutions

2.1.Azure Virtual Machines (VMs): Week 3-4

-Used to host applications, training platforms, and internal systems used by students and staff.

2.2Azure Storage Accounts: Week 4-5

-Provides secure storage for course materials, student records, assignments, and administrative documents.

2.3.Azure Active Directory (Azure AD): Week 2-3

-Manages user identities and secure login access for students, lecturers, and administrators.

2.4.Azure App Service: Week 6-7

-Hosts web applications such as the online learning platform or student portals.

2.5.Azure Backup: Week 7-8

-Ensures that important data such as student records and training content are regularly backed up.

2.6.Azure Virtual Network (VNet): Week 1-2

-Provides a secure network environment connecting Azure services and controlling access.

2.7.Azure Monitor: Week 8-9

-Tracks system performance and helps IT administrators monitor the health of applications and infrastructure.

2.8.Azure SQL Database: Week 5-6

-Stores structured data such as student information, course data, and system records.
